

# Intuitive, integrated, cloud-based payroll software

A completely fresh approach that leaves complicated systems consigned to the history books.

Introducing Jemini Payroll — the one-touch system that's helping accountants, HR managers and payroll employees to breathe a sigh of relief and get back to doing what they love and loving what they do.

## Finally! Payroll software that's beautiful to use

Slaving away on payday is over. The slick payroll experience you've been waiting for is finally here!

With the automated calculations done for you, it just takes a single click to process each pay run. Plus, with a user-centric design and full control when you need it, it's never been easier to get a comprehensive overview at a glance.

## Unbelievable real-time payroll visibility

We designed Jemini to make life easier for you. It gives you a real-time view of pay and leave. It even gives you the ability to view pay and leave at any point in the future, giving you the insight and reporting needed to make informed business decisions and forecast accurately. It's easy to pull of the reports that you need on demand and you won't be left waiting for the information that you need.

## Designed for the future of work

Payroll in Jemini is designed for the modern workplace. The workplace that moves and changes rapidly. That's why Jemini supports multiple payment frequencies and types. Catering for paid overtime, commissions, piece rates and employees who receive allowances and disbursements.

Most importantly, it gives employees the self-service experience they demand when working on-site or remotely, so they can have a real time view of their accrued leave at different points in time.

## Go beyond the limits of other payroll systems

Payroll systems can make you want to pull your hair out. That's why Jemini caters for even the most complex of situations. Date effectiveness means you can deal with mid-cycle start dates and terminations with ease, without needing to make tedious manual calculations. You can throw almost anything at Jemini and it's going be there to do the heavy lifting for you.

## Why do Payroll departments ❤️ Jemini?

- Web-based: access from anywhere
- Date Effective and Future Dated
- Supports multiple work patterns, agreed hours and payment frequencies
- View pay at any date in the future and process multiple pays any time
- Load data at any time — no restrictions
- Automated payslips
- Access real-time reporting with Microsoft PowerBI
- Automated online payroll approval
- Run multiple payrolls concurrently for multiple legal entities
- Secure self-service portal for employees
- Compliance with SuperStream and ATO Tax legislation

## ATO Single Touch Payroll (STP) compliance

Jemini is STP compliant and will integrate directly to the ATO using API integration through to the ATO.

## Backpay

Jemini can automatically apply back-pay according to the pay parameters that you set.

## Reporting and Analytics

With a Microsoft PowerBI integration you will get clarity and insights from the reports you actually need. You'll never make better decisions.

## Mid-pay cycle pay change

Has somebody's pay rate changed mid-pay cycle? That's no problem for Jemini!

## Mid-pay cycle start or termination

Automatic pay calculation even when you have new starters who join mid-pay cycle.

## Superannuation

Manages all aspects of Superannuation including SGC, defined benefits, voluntary contributions and salary sacrifice.

## Superstapling

Jemini's API to ATO will support the processing of employee stapled funds now and into the future.

## WGEA - Workplace Gender Equality Agency

Caters for compliance with the WGEA for direct upload into the portal

## Penalties & Allowances

Jemini can either interpret these from your attendance or you can submit an online timesheet.

## Employees with multiple rates

Jemini can deal with employees who have multiple pay rates.

## Alternate day for public holidays

Working on a public holiday automatically generates an alternate day credit based on the employee's work pattern.

## Penalty rates for public holidays

Penalty rates automatically paid on public holidays if they are required in your organisation.

## Annual leave when an employee changes their agreed hours / days per week

Where an employee moves from FT to PT (or vice versa), Jemini will automatically revalue their annual leave balance.

## Auto-adjust existing leave requests

If an employee moves from FT to PT (or vice versa), their future leave balance will be recalculated based on the new work pattern.

## Manage double dipping

When your employee goes on leave, the paying of the annual leave to the employee means their ordinary weekly pay calculation will omit the transaction that is already included in the leave payment.

## Deal with variable work patterns

Jemini can handle variable work patterns up to an eight week variation.

## Set employment end-dates

Enter an employee end-date either now or in the future.

## Public holidays automatically updated

Statutory public holidays automatically updated.

## General Ledger Integration

Posting of salary, wages and on-costs including long service leave liability and other leave liability reporting.

## Leave Accruals

Manages leave balances for annual, personal, long service leave and other leave types. Get your leave accruals/balances at any time.

## View annual leave accrual in weeks / days / hours

Always have an up to date view, even if there is a change in work pattern. Project your leave balance in real time, anytime!

## Award Interpretation

Automated award interpretation and pay conditions engine guarantees wages are paid correctly and calculated in compliance with Fair Work.

## Our story

### We deliver business solutions that make a difference

Fusion5 offers a full range of digital innovation solutions, applications, consulting services, development, cloud and managed services as well as first class support services for your business. Our expertise covers all your key functional areas, including Enterprise Resource Planning, HR / Payroll, Customer Experience, Customer Relationship Management, Service Management, and Infrastructure.
